Prompt Engineering

Subhrajyoti Dash(SJ)

QA Lead At BT | GenAI | Agentic AI | MCP | Prompt Engineer | Test Automation Specialist
Bangalore Urban, Karnataka, India

Summary

I work at the intersection of quality engineering, automation, and real-world delivery pressure. Over the last 10+ years, I've moved from writing manual test cases to leading QA for large-scale telecom and digital platforms, and most recently into a QA Lead role driving end-to-end quality for checkout journeys (Broadband + SIM). Here's the thing — I don't believe in QA as a gatekeeper. I believe in QA as an accelerator. That's how I approach my work:

- Build automation early (in-sprint), not after damage is done
- Focus on high-signal coverage, not vanity test counts
- Reduce manual effort using AI and smart tooling, not just more scripts
- Keep teams practical — ship fast, but don't break the product

Right now, I'm:

- Leading a team of QA engineers across Web, App, and API layers
- Driving Playwright-based in-sprint automation to improve release speed
- Introducing AI-assisted testing (Copilot, AmazonQ/KIRO, MCP, Agentic AI) to cut down repetitive work
- Setting up QA standards and test strategy where things are still evolving

Before this, I've:

- Built automation frameworks across Selenium, WDIO, Appium, API, and performance testing
- Reduced effort significantly (e.g., 3 days → 30 minutes in test data setups)
- Worked deeply with Kafka, Wiremock, CI/CD pipelines, and large-scale systems
- Led QA across multiple squads and distributed teams

Tech apart, I spend a lot of time mentoring engineers — not just on tools, but on how to think: what to automate, what not to, and how to avoid over-engineering. I'm especially interested in teams that:

- Care about quality as a system, not a phase
- Are serious about automation + AI in testing
- Move fast, but are willing to fix the fundamentals

Experience

BT Group

3 years

Quality Assurance Team Lead

April 2026 - Present (3 months)

Bengaluru

1. Leading a team of 6 QA engineers across Broadband and SIM acquisition journeys.
2. Defined and implemented QA standards, test strategy, and quality gates for a multi-journey checkout platform.
3. Introduced in-sprint automation using Playwright, improving regression coverage and enabling faster releases.
4. Driving AI adoption (Copilot, Amazon Q, KIRO) to reduce manual testing effort and improve productivity.
5. Ensuring end-to-end quality across Web, App, and API layers.
6. Mentoring team on automation-first mindset and smart use of AI tools.

QA Engineering Manager

May 2024 - March 2026 (1 year 11 months)

Bengaluru

1. Led QA delivery across multiple squads (~50 engineers including vendors and internal teams).
2. Defined automation strategy and quality practices across Web and App platforms.
3. Collaborated with Product, Architecture, and Design teams to align quality goals with business outcomes.
4. Reviewed automation coverage and optimized scripts for faster release cycles.
5. Managed vendor alignment and ensured consistent QA standards.

Engineering Specialist

July 2023 - May 2024 (11 months)

Bengaluru

Broadband

1. Thoroughly reviewing and comprehending product requirements.
2. Developing stubs based on the specified requirements.
3. Executing comprehensive testing at the component level and providing an exit report to the E2E team.
4. Offering mentorship to colleagues to enhance testing productivity.
5. Pioneering innovative strategies to facilitate verification and validation, ensuring timely releases.

airtel

Principal Software Engineer

May 2021 - June 2023 (2 years 2 months)

Bengaluru, Karnataka, India

Airtel DTH, Wynk Studio, Airtel Gaming

1. Responsible for Developing Test automation frameworks and test suites.
2. Perform manual testing for Web application & Rest Api, write automation test scripts for it and enhance the automation regression test suites by adding & prioritizing new test cases to it.
3. Check application server logs for any exceptions, using ssh terminal (MobaXterm) and unix/Linux commands.
4. Participate in story grooming, sprint planning, and story effort Estimation.
5. Perform regression test suite execution using Jenkins jobs and do test suite maintenance & refactoring.
6. Perform product demo to Product Owner or APO.

Oracle

Senior Software Engineer

August 2020 - May 2021 (10 months)

Hyderabad, Telangana, India

Oracle Data Cloud

1. Taking Ownership of Epics based on quarterly planning.
2. Creating and maintaining automation suites for various pods.
3. Mentoring and led the team for timely delivery of the product

ProKarma

Senior Software Engineer

December 2018 - August 2020 (1 year 9 months)

Hyderabad

SecureID, T-Mobile, USA

1. Automating in Sprint User Stories using Selenium, Rest Assured, and Appium.
2. Validating UI, Web Service, and Mobile functionality through automation scripts.
3. Taking ownership of building Sanity, Regression, and Payload for Weekly releases through Jenkins.
4. Performing hotfixes on Script issues and optimizing the suite.

IMImobile

Test Engineer

March 2016 - November 2018 (2 years 9 months)

Hyderabad

DPDP(Product), TTSL(Mumbai)

1. Responsible for Web Service Testing using REST API & Rest Assured.
2. Delivering the project by performing different types of testing like System Testing, Integration testing, Regression, UAT, Product Smoke Test as part of the project.

Aricent

Test Engineer

June 2015 - December 2015 (7 months)

Hyderabad

SP-FUT, Qualcomm

1. Flashing the device by ADB commands & JTAG.
2. Comparing all reported issues of QRD devices with Nexus and MTP devices.

ESSAR STEEL SERVICES (ODISHA) PRIVATE LIMITED

Industrial Automation Engineer

February 2014 - April 2015 (1 year 3 months)

Paradip Garh Area, India

Education

Synergy Institute of Engineering and Technology (SIET), Dhenkanal

BTech - Bachelor of Technology, electronics and telecommunication engineering · (2009 - 2013)

S.V.M. Autonomous College, Jagatsinghpur,

Intermediate, PCMB · (2007 - 2008)

Pankapal HighSchool

Matriculation, 10th Board · (2003 - 2006)
